

# Case Study

## Guiding National Security Policy Making

### Total Security Management

#### Situation

Diligent Innovations played a key role in the development of the White House and DHS strategies for Global Supply Chain Security and Air Domain Awareness. Diligent was brought in to provide subject matter expertise and rigorous analytical support to these broad-based strategic efforts resulting in the release of two significant national security documents.

#### Solution

Diligent Innovations was responsible for coordinating analysis and thought leadership in the areas of critical infrastructure resilience and aviation intelligence, respectively. Specific actions and deliverables included:

- Providing subject matter expertise across a variety of specific topics;
- Delivering overview briefs for new team members;
- Briefings and talking points for senior White House leadership; and
- Team Lead for Security, Resilience, and Intelligence focus groups.

Diligent's analytical framework for these projects also included analysis of the complex interdependencies among competing national security activities including U.S. and international programs, relevant laws, rules and authorities, and current and planned strategy and policy.

#### Results: Expert, Unbiased Advice

Diligent's support helped complete strategies guiding national interagency efforts across two fundamental areas of homeland security, the safeguarding and resilience of global supply chains and the protection of the air domain.
